

Information Literacy 1

Level 1 Exercise 2

Information Literacy 1, Level 1 Exercise 2

“Analysing your search question”:

Self-healing materials are used more and more, for example, in sports, building, transport and electronics. A new option is a self-healing layer on smartphone or tablet touchscreens, which uses UV radiation to repair scratches.

Search question:

Describe recent developments (from 2010) in the application of self-healing materials on touchscreens.

Q1. What is the directive word in this search question?

Q2. What is the constraint in the search question?

Q3. I am only interested in information about developments in Europe.

True

False

Q4. What are the three key concepts from the search question.

application

materials
