

# Document your steps: literature search

15-Dec-15

Main research topic (key question):

Sub-questions (if necessary):

Aspects of the main topic or sub-question(s):

*\* Please note: copy the table and use a separate table for each sub-question!*

<b>Aspects: combine with AND</b>				
<b>Synonyms: combine with OR</b>	<i>aspect 1:</i>	<i>aspect 2:</i>	<i>aspect 3:</i>	<i>aspect 4:</i>

Search queries:

- 1.
- 2.
- 3.
- 4.
- 5.

*\* Please note: it is a good idea save your final, combined query as an alert!*

Sources used:

Any search queries edited (how, why, when):

Collected references (possible citations):

*\* Please note: collect and annotate your references in Reference management software, e.g. EndNote or Mendeley.*

Possible results

- Reading list (annotate with own observations/ideas for further use during processing)
- Literature review
- Bibliographic database (e.g. customised EndNote or Mendeley library)
